Annual Educational Conference Announcement

In this issue...

- **President's Message**
- **District Director Feature**

Official Publication of the Ohio Environmental Health Association

www.ohioeha.org
www.facebook.com/ohioeha
www.twitter.com/OhioEHA

The object and purpose of the Association shall be the betterment of the health and welfare of mankind through the improvement of the environment. This shall be done by sponsoring state and regional meetings and publications, by developing methods of measuring and evaluating achievements in environmental health, the establishment of a central point of reference and education material for the membership, the procurement of cooperation with other agencies and organizations, and such other activities as will lead to the greater efficiency and professional growth of the membership.

President's Message

Courtney Myers, MPH, REHS
Stark County Health Department

Dear OEHA Members,

I hope this message finds you well and enjoying the early signs of spring. This is a particularly busy time for the Ohio Environmental Health Association (OEHA), as we have begun the 136th

General Assembly and Ohio's biennial budget process. I want to provide you with an important update on key legislative developments and initiatives that may impact environmental health in Ohio. The OEHA Board, in collaboration with Hicks Partners, is actively navigating this shifting landscape as new developments occur.

Solid Waste Proponent Testimony: House Bill 96

Earlier this month, I had the privilege of providing proponent testimony on behalf of OEHA regarding HB 96 Ohio's Biennial Operating Budget. Within the proposed budget OEPA included changes to solid waste funding. In Ohio, 65 local health departments partner with Ohio EPA by playing a vital role in the regulation of solid and infectious waste, and construction and demolition debris (C&DD) programs.

Currently, the funding for Solid Waste Programs is limited, with local health departments relying on a small percentage of facility license fees and unreliable grant funding from their respective solid waste management districts. HB 96 proposes to address this issue by reallocating fees to local

health departments. Specifically, OPEA's proposed language would do away with the \$1.60 per ton C&DD fee at Municipal Solid Waste Landfills, although this rate would still apply at C&DD landfills. Of the tipping fees paid at Municipal Solid Waste Landfills \$0.45 per ton would be allocated to local health departments. If passed this would create a sustainable funding model for Solid Waste Programs. OEHA is strongly in favor of the "As Introduced" version of this legislation, as it establishes a reliable funding stream for maintaining this crucial program.

Microenterprise Home Kitchen Operations: House Bill 134

House Bill 134, introduced by Representatives Gross and Humphrey, seeks to establish a new pathway for individuals to prepare and sell food from their homes, known as Microenterprise Home Kitchen Operations. OEHA's Food Committee, led by Chair Scott Whittaker, is currently reviewing the proposed Bill and will make recommendations to the Board. We will continue to monitor this Bill closely.

REHS Occupational Credential: House Bill 59

As mentioned in the previous Journal, the Registered Environmental Health Specialist (REHS) credential is undergoing a review as part of the General Assembly's Occupational License Review. Last fall, OEHA established an Ad-Hoc Committee on Occupational Credential Review, supported by Tony Brigano and Lauren Strobe at Hicks Partners, to prepare

for potential legislative changes.

As expected, Representatives Fowler Arthur and Hiner have introduced a placeholder House Bill 59. This bill aims to revise and streamline occupational regulations to better accommodate Ohio's workforce. OEHA's workgroup, having spent the past several months preparing, has developed proposed language to ensure the integrity of the REHS credential, while also strengthening the environmental health workforce across the state. We will continue to work with our legislative partners throughout the legislative process and will provide you updates along the way.

Annual Education Conference (AEC)

The OEHA Annual Education Conference (AEC) is fast approaching! Mark your calendars for April 10 & 11, 2025, at the Columbus Marriott Northwest. OEHA Vice President Emily Tyler, Vice President-Elect Alyssa Suto and their team have been working tirelessly to craft an exceptional conference. This event is a fantastic opportunity to earn CEUs, network with colleagues, and deepen your engagement with the organization.

In addition to the main conference sessions, we are offering pre-conference events, including a fun outing at Combat Ops and an

norweco[®]

SINGULAIR[®]

- ◆ Designed for 500-1,500 GPD flows

evening of socializing with food and drinks in the hotel lobby on Wednesday. You can register for the conference and view additional details at ohioeha.org.

Why OEHA Membership Matters

Your membership in OEHA plays a critical role in supporting the ongoing efforts to advance environmental health in Ohio. As a member, you gain a voice in legislative advocacy, with access to critical updates on proposed bills and a seat at the table in shaping policy decisions that affect our profession.

Beyond legislative efforts, OEHA membership offers valuable opportunities for networking, professional development, and leadership growth. Whether at the district or state level, membership demonstrates your commitment to environmental health and provides you with avenues to develop as a leader in the field.

I encourage you to share the importance of OEHA membership with your coworkers, in particular those newer in their careers. Share what OEHA has done for your career and the field of environmental health.

Thank You Members

Thank you again for your continued support of OEHA. Your membership is the foundation of our success. OEHA remains committed to advancing environmental health for our members and the communities we serve.

I look forward to seeing you at AEC!

In Service,
Courtney Myers, MPH, REHS
President, OEHA

A Sanitizing Wipe That's Effective Enough to Do It All

Restaurants can improve operational efficiency with NEW wipes formulated for food-contact surfaces with no rinsing or gloves needed!

- 1** step to quickly and conveniently sanitize and disinfect surfaces
- 30** seconds to kill the virus that causes COVID-19
- Eliminates 99.9%** of viruses and bacteria, including norovirus, *Salmonella*, *Listeria*, and cold & flu

Featured District Director's Message: Northwest

Van Creasap MPH, REHS
Marion Public Health

Greetings, fellow environmental health professionals!

It is an honor to serve you as the 2025-2026 Northwest District Director for the Ohio Environmental Health Association (OEHA). My name is Van Creasap, and I'm thrilled to introduce myself to all of you.

I hail from Waldo, Ohio, where I not only work in public health, but also own and operate a small vineyard winery that my grandfather began operating commercially in 1984. It's a family business that I'm incredibly proud of, and it's one of the many ways I stay connected to my roots.

I first began my journey in public health as an intern collecting mosquitoes, and I quickly fell in love with the field while watching my talented coworkers practice their craft. The impact that environmental health professionals have on communities is inspiring, and I knew right away that this was the career for me.

As your new district director, I'm committed to supporting and advocating for all of you. I'm excited to collaborate with such a

passionate and dedicated group of professionals. Let's continue to work together to make our communities safer, healthier, and more sustainable.

Please join us for the Northwest Fall Educational Conference. The conference will be held on October 9-10, 2025 at Kalahari Resorts in Sandusky. Visit our page on the OEHA website for updates regarding registration, agenda, and more. Our planning committee is working hard to bring you a wide range of topics and dynamic speakers!

Don't hesitate to reach out to me with any questions, ideas, or thoughts on how we can make the Northwest District even better. Looking forward to an exciting and productive year ahead!

Warm regards, Van Creasap, MPH, REHS
Northwest District Director Ohio

**Environmental
Protection
Agency**

Introducing OEHA's new Administrative Aide

**Lauren Strobe: Manager, Government
Relations & Association Management
Hicks Partners, LLC**

Lauren Strobe's academic and professional background reflects a strong foundation in public policy and government affairs. She earned a Master's degree in Political Science with a specialization in policy analysis and a Bachelor's degree in Public Administration from Miami University. Her education, combined with diverse professional experiences, has positioned her as a dedicated and knowledgeable advocate in government relations.

Lauren's academic pursuits included volunteering at the Refugee Center in Luxembourg, providing her with a broader perspective on global policy challenges. In the United States, she worked closely with local government entities such as the Fairfield County Commissioners and the Regional

Planning and Building Department, where she applied her expertise to administrative and planning initiatives.

She further developed her policy expertise through a fellowship focused on pretrial justice policy in Cincinnati and Washington, D.C., gaining valuable insight into the legal and legislative aspects of the criminal justice system. Her career then transitioned into political campaign management, where she led a county-wide campaign effort. Following this, Lauren served as a legislative assistant at the Ohio House of Representatives, where she managed constituent communications and legislative affairs.

Today, Lauren applies her experience in government relations and association management at Hicks Partners, where she continues to support clients in navigating complex policy and legislative matters. Her dedication to public service and her deep understanding of government processes make her a valuable asset in the field.

Call for Articles

For as long as the Ohio Journal of Environmental Health has existed the Publications Committee has been asking for participation from you, our members. As the 74th volume of the Journal begins, the Publications Committee again asks for your help making the Journal the best it can be.

The Journal flourishes when it is telling your story. Perhaps that story is how you took a unique approach to address that persistent public health nuisance. Per chance that story tells of how you leveraged data to reduce pollution into your streams or waterways. Maybe that story involves a new teaching technique in the field that resonates with operators. It could even be that you have a program that few other local health districts operate and they would be interested in learning more about.

Articles take time to write and we are all busy so the hardship is understood. However, in addition to sharing with your colleagues you stand to be published. Once published you also become eligible to win the prestigious annual OEHA publications award for your efforts to promote the great work you and your agency does. Unfortunately, in 2024 no article was submitted that met criteria to win the publications award; next year we want you to win!

Whatever your story is, it will surely help us all grow. And, the growth that comes from sharing with each other will strengthen our combined effectiveness to obtain the objective of OEHA, aiming for the betterment of the health and welfare of humankind through the practice of Environmental Public Health.
